AVERAGE SQUARE FOOT AREA COVERAGE, MINIMUM TO MAXIMUM*

ATS-1200TE-PCO	1,000 to 3,000	ATS-1200T-PCO	1,000 to 3,000
ATS-1202TE-PCO	1,000 to 3,000	ATS-1202T-PCO	1,000 to 3,000

* Square foot coverage numbers are listed with a built in safety margin to accommodate houses with a higher than normal rated capacity HVAC system for total scfm based on total square footage. In a house with a higher scfm HVAC rating unit per sq. footage, we would then have a tendency to size an Air UV within the minimum safety margin square footage coverage. A house with a standard sized HVAC scfm unit per sq. footage could go to the maximum capacity coverage of the UV Air unit.
